

The **key insights** are:

- **Overall business is profitable**, with approximately **₹10.38M revenue** and **₹2.36M profit**.
- **Overall profit margin is around 22.7%**, indicating healthy profitability.
- **Home & Kitchen** is a strong profit contributor, generating approximately **₹7.22 lakh profit** with a **23.7% margin**.
- **Beauty has the highest profit margin (~39%)**, making it the most attractive category for expansion.
- **Electronics is the main concern**: it generates the highest revenue but has a low **13.1% profit margin** and the highest inventory days (**~44.6 days**).
- **Bluetooth Speakers, Headphones, Smartwatches and Power Banks** are slow-moving/attention products because of high inventory days and relatively low margins.
- **Inventory Days vs Profit correlation is only 0.18**, showing a **weak positive relationship**; inventory duration alone does not determine profitability.
- **Monsoon is the strongest season**, generating the highest revenue (**~₹33.76 lakh**) and profit (**~₹7.52 lakh**).
- **Summer has the highest seasonal profit margin (~23.3%)**, indicating relatively efficient sales during this period.
- **Regional performance is relatively balanced**, with East generating the highest total profit.
